Compare our flat fee to the thousands you are probably paying each month. Keep in mind we offer different things, so it's a bit of apples and oranges.

But we think most restaurants will want.

“My stomach turns every time I open my Grubhub bill. I realize I agreed to pay 12.5% as Grubhub’s commission, but after looking at my bill, I now realize the actual rate is much higher.

Grubhub also takes their commission on the delivery charge of the order. For an order that runs \$20 (including tax and delivery), the effective rate is an almost a whopping 15%.

*Add in their credit card processing rate (3.05%+ \$.30 per transaction), and the charge to process a \$15.52 sale is over 20%. **For all intents and purposes, I’m losing money on my orders.”***
